# E -Prep Project

Include-Preparation Portal for
Teachers-Students-Parents
Including Abroad Studies

E-Prep is designed for taking up of digital technologies in parallel to specific needs of users, improve digital competences and practical knowledge of educators, students and parents, by means of development and use of open training resources, open source LMS/CMS* and free and opensource communication software.

•**LMS** stands for **learning management system** and **CMS** stands for content management system
https://synergy-learning.com

# E-Prep is also being designed to:

•**introduce** e-tools and e-opportunities for, the initial and continuous professional development of VET trainers in both school and work-based settings, through the development of effective digital, open and innovative education and pedagogies, with practical e-tools;

•**support** the uptake of innovative approaches and digital technologies for teaching and learning priority of the call; in parallel, the Digital Education Action Plan;

•e-Learning systems employ the **SELFIE self-reflection tool** to support trainers' self-analysis before they join to e-Prep

# COURSES

- Resulting scenarios and agreed methodology in parallel will be developed in a way that ultimately, potential users will be trained step by step regarding how to improve skills in aiming teaching/learning and assisting.

- It will address actual e-Learning and e-Life realities and practical knowledge and also examples, reputable references, links and story telling avatars support.

- Trainers will be furnished by Hybrid training idea/principles and 360 VR video applications for their **e-VET** efforts for bringing their workshops/laboratories in to virtual classrooms; on top of furnishing them with ICT knowledge which they are short of Self Assessment and e-Readiness check questionnaire to figure out their e-Prep needs.
